

Soundwell Steel Cycle Shelter

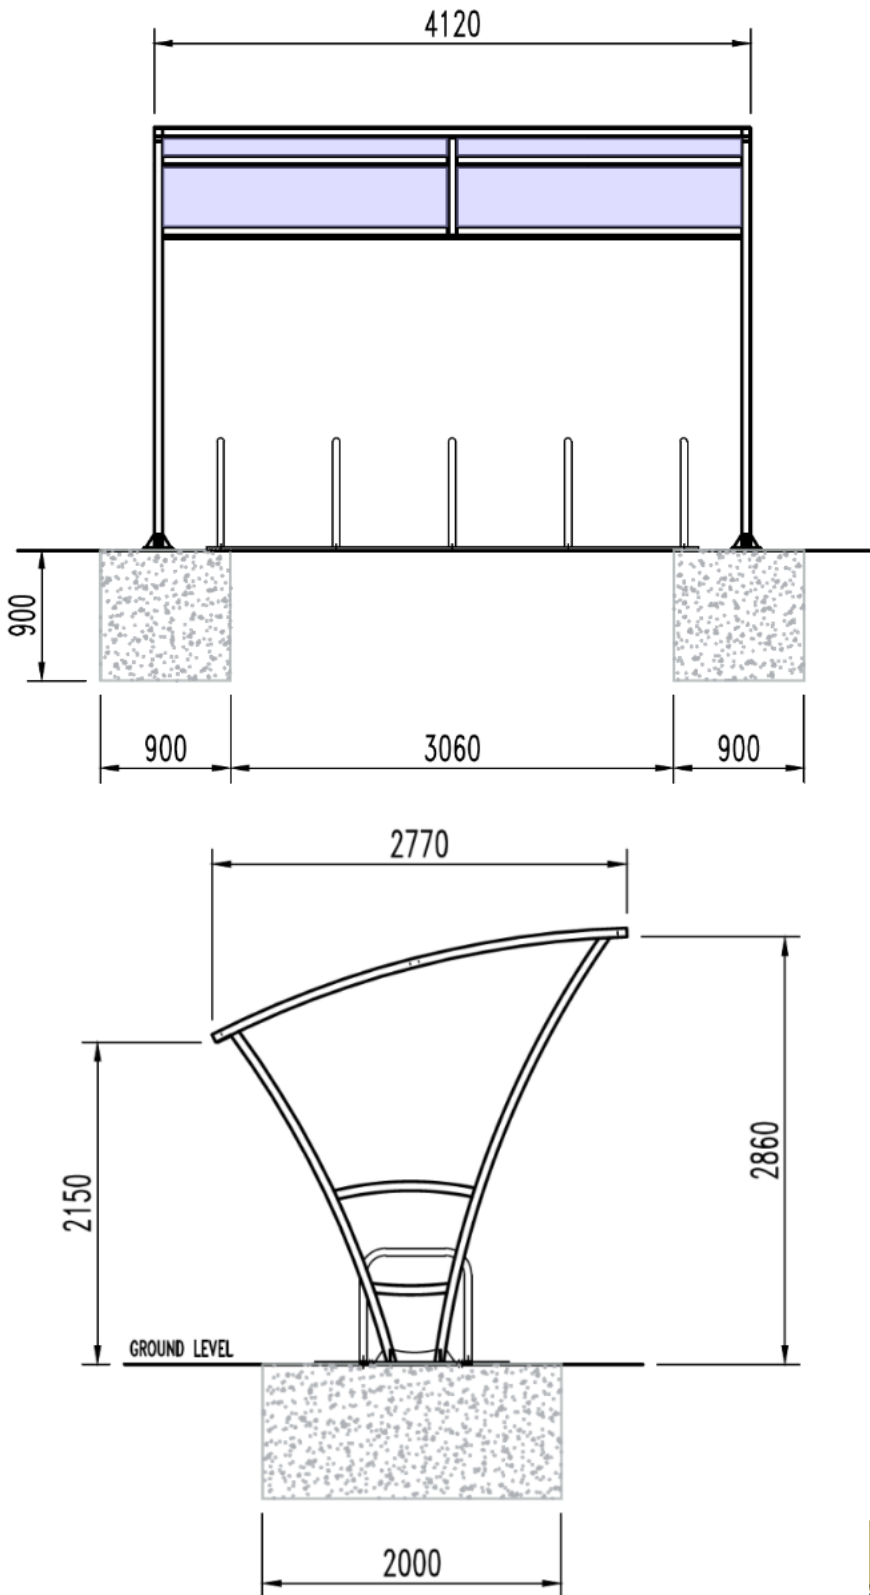

Our **Soundwell cycle shelter** is based on a simple, elegant modular design which is widely used in education, commercial & healthcare settings. Features include:

- Roof-only design with no side or back walls helps to save space and allows access to the shelter from both sides.
- Unlimited and bespoke lengths possible
- Easy to maintain - the roof only design is less likely to be subject to vandalism compared to a quadrant style shelter

Material specification:

Manufactured from durable galvanised, powdercoated steel in accordance with EN 10219:2006
High quality PET-G UV2 polycarbonate roof sheets
Powdercoated to BS3900 with a wide range of colours available.
Cloaking (if required) provides an aesthetically pleasing and more durable finish
Choice of cycle hoops or scooter racks available, in galvanised or powdercoated finish

Technical drawing

The Soundwell is manufactured in modules starting at either 4.1m or 5m width. These can be increased in line with the number of cycles or scooters required to be stored.

Unfortunately doors and other security features are not available with this type of shelter.
